Students will relate science to technology, society, and the environment. They will develop the skills, strategies, and habits of mind required for scientific inquiry, and understand the basic concepts of science.

Course Description:

This course enables students to enhance their understanding of concepts in biology, chemistry, earth and space science, and physics, and of the interrelationships between science, technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills.

Course Strands:

Scientific Investigation Skills and Career Exploration, Biology, Chemistry, Earth and Space Science, and Physics

Units of Study:

Unit 1: Tissues, Organs and Systems of Living Things
Unit 2: Chemical Reactions
Unit 3: Climate Change
Unit 4: Light and Geometric Optics

Teaching Strategies:

A variety of teaching and learning strategies will be incorporated throughout the course.

Assessment & Evaluation:

Assessment and evaluation will encompass all four categories of achievement: **Knowledge and Understanding; Thinking/Inquiry; Communication; and Making Connections/Application.** This course will involve a number of assessment and evaluation strategies that will provide all students an opportunity to meet with success.
