

Henry Street High School

HPW 3C1

Living and Working with Children, Grade 11, College Preparation

COURSE OUTLINE

COURSE DESCRIPTION	<i>This course focuses on the well-being of children in family and community settings. Students will study child behaviour and child development in the context of relationships with parents and others in the community, and will learn through research and by observing and interacting with children. This course prepares students for further study of children and introduces them to skills used in researching and investigating children's behaviour in response to others.</i>
