

2018 – 2019 Classroom Placement Information

Class placement meetings for the September 2018 school year will take place in early June. The teachers and administration work collaboratively together to determine the best class placement for all of our students. The following factors are carefully considered when class placement decisions are made:

- Learning style, needs of students
- Teaching style
- Social skills and peer interactions / gender combinations
- Special requirements (resources, technology, etc)
- Ministry guidelines regarding class size
- New registrations and withdrawals from our student population over the summer

Teachers who work with your child(ren) have the best perspective on these issues and will be working closely together with administration to make good decisions for the students, teachers and Sir Samuel Steele PS, as a whole. Your input is valued and you are welcome to provide information that may assist your child's teacher in making these important decisions. Please do not suggest teacher's names (as teacher assignments are subject to change), rather suggestions for learning style considerations and social concerns that may help staff to find the best placement.

While we will consider all parent information and requests, final class placement decisions will be based upon the professional judgment of Sir Samuel Steele PS staff.

Please send any important information regarding class placement in written format (letter or email) by May 25th, 2018 to the attention of Jeff Knox. Email: jeffrey.knox@ddsb.ca
